ROAD

ELITE ROAD

Ultra-light, efficient race-focused bikes engineered to get you to the finish line first.

ENDURANCE ROAD

Pure race performance meets all-day comfort. Perfect for the northern Classics, Gran Fondos and long days in the saddle.

TRIATHLON/TT

High-tech aero bikes designed to give you every advantage over the wind and the clock.

CYCLOCROSS

Made to dominate the muddy battles of 'cross racing or accelerate your morning commute.

ELITE ROAD

SUPERSIX EVO

THE UNFAIR ADVANTAGE.

SUPERSIX EVO BLACK INC.

FRAMESET: SuperSix EVO, BallisTec Nano Carbon WHEELSET: ENVE Smart 3.4 Tubular/Chris King CRANKSET: HollowGram SISL2
w/SpideRing (53/39 & 50/34 incl.) COCKPIT: ENVE Composites GROUP: Shimano Dura Ace 9000 COLOR: Nearly Black w/ Gold - Matte

The SuperSix EVO is the ultimate road racing machine. With its perfect balance of all the key factors of performance - weight, stiffness, strength, compliance, handling and aerodynamics - the EVO is so good that Peter Sagan calls it his "unfair advantage".

BALLISTEC CARBON

Cannondale's high-strength carbon construction method delivers extreme light weight and perfectly tuned stiffness, without sacrificing strength.

LESS DRAG

Smaller diameter frame tubes means less frontal area and less drag than the oversized competition, without the added weight and harsh ride of aero frames.

SPEED SAVE MICRO-SUSPENSION

Subtle flex zones built into the chainstays, seatstays and seattube allow the rear wheel to track the ground, improving speed, handling and comfort. Tuned to work with the SPEED SAVE Fork.

SPEED SAVE FORK

BallisTec Carbon and offset dropouts deliver tuned vertical compliance and razor sharp handling. Works as a system with rear triangle.

THE UNFAIR ADVANTAGE.

EVO FRAME OPTIONS

1 - EVO NANO: The lightest production frame on the planet utilizes advanced high modulus BallisTec Construction and nano tech resins for maximum weight savings.

2 - EVO HI-MOD: The frame that started it all in 2012. High modulus BallisTec construction delivers extreme light weight and stiffness.

3 - EVO CARBON: By using a higher percentage of intermediate-modulus fiber to tune the stiffness, we are able to expand the EVO line with a super high-performance, sub-950 gram frame. Offered both with and without internal rear brake routing.

ELITE ROAD

CAAD10

THE ONE. THE ONLY. THE 10.

CAAD10 BLACK INC.

FRAMESET: CAAD10 SmartFormed 6069, full carbon fork WHEELSET: Mavic Ksyrium Elite S WTS CRANKSET: Cannondale HollowGram Si, 50/34
COCKPIT: Cannondale C1 GROUP: SRAM RED 22 COLOR: Black Anodized, w/ Berserker Green - Matte

The legendary CAAD10 needs no introduction. With its SmartFormed Alloy frame, SPEED SAVE micro-suspension system and EVO-based geometry, it is lighter, stiffer and smoother than many of its carbon competitors. It is simply the world's finest aluminum road racing machine.

CAAD10 ULTEGRA

FRAMESET: CAAD10 SmartFormed 6069, full carbon fork **WHEELSET:** Mavic Aksium S WTS **CRANKSET:** FSA SL-K Light Carbon BB30, 50/34

GROUP: Shimano Sora **COLOR:** Jet Black, w/ Gray, Silver - Matte

ENDURANCE ROAD

SYNAPSE

CRUSH MEETS PLUSH.

SYNAPSE HI-MOD
BLACK INC.

FRAMESET: Synapse, BallisTec Hi-MOD Carbon WHEELSET: Vision Metron 40 CRANKSET: HollowGram SiSL2 w/SpideRing, 50/34
COCKPIT: FSA SL-K/OS-99 GROUP: Shimano Dura Ace 9000 COLOR: Nearly Black, w/ Black, Gray - Matte

From the beautiful effort of the Gran Fondos, to the cobbled chaos of the Northern Classics, to all-day-epic adventures of your own making, the all-new Synapse's balance of raw power and all-day ridability means that "endurance" is no longer code for "boring".

S.E.R.G. SYNAPSE ENDURANCE RACE GEOMETRY

S.E.R.G. strikes the ideal balance between pure race positioning and upright comfort. Perfect for long days in the saddle and confident handling on all road surfaces.

SAVE PLUS - SEATPOST/SEAT TUBE

The shaped seat tube and 25.4mm seatpost are designed to flex together for additional comfort when seated.

POWER PYRAMID/BB30A

The seat tube splits asymmetrically to meet a new wider 73mm BB30A bottom bracket, for maximum stiffness with minimal weight.

SAVE PLUS-FORK

The shaped fork blades and offset dropouts let the front wheel track smoothly over rough surfaces. Works as a system with the rear triangle.

CRUSH MEETS PLUSH.

SAVE PLUS - REAR TRIANGLE

The helixed shapes of the rear stays work with the fork to absorb bumps for better comfort and control. The seat tube and 25.4mm seatpost flex together for additional comfort in the saddle.

SYNAPSE HI-MOD RED

FRAMESET: Synapse, BallisTec Hi-MOD Carbon **WHEELSET:** Mavic Ksyrium Elite S WTS **CRANKSET:** HollowGram SiSL2 w/SpideRing, 50/34

TRIATHLON / TIME TRIAL

SLICE

NARROW IS AERO.

SLICE RS ULTEGRA

FRAMESET: Slice RS Hi-MOD Carbon WHEELSET: Vision Team 30 Aero CRANKSET: HollowGram Si, 53/39 COCKPIT: FSA OS Slice RS Si
GROUP: Shimano Ultegra 6800 COLOR: Jet Black w/ White, Green - Gloss

Everything on the Slice RS is designed to minimize frontal area, which reduces drag and lets it slice through the wind. The ultimate weapon for time-trialists and triathletes seeking the fastest way to the finish.

CFIT SYSTEM

The modular bar/armrest adjustment system allows a larger range of aero position adjustment than a standard bar/stem set-up.

NAEROTEC SEATPOST

The thinnest UCI-legal seatpost ever made. Its tiny frontal area causes minimal disruption of air flow over the top tube. Reversible.

NAERO-TEC FORK

External steerer design allows for an incredibly narrow headtube for reduced drag, while being extremely stiff for precise handling.

WINDSHADOW BRAKES

Integrated brakes hide in the windshadow of the fork and BB. Easy-to-adjust V-brake design provides tons of stopping power.

NARROW IS AERO.

WINDTUNNEL PRESSURE-DRAG REDUCTION TUNNEL

The WindTunnel channel behind the seat tube reduces the pressure drag on the wheel, allowing it to spin more freely.

SLICE ULTEGRA

FRAMESET: Slice, full carbon WHEELSET: Shimano RS11 CRANKSET: FSA Trimax TT, BB30, 53/39 COCKPIT: Cannondale C3 base / FSA Tri Max Team
GROUP: Shimano Ultegra 6800 COLOR: Jet Black w/ White, Silver - Gloss

SLICE 105

FRAMESET: Slice, full carbon **WHEELSET:** Shimano RS01 **CRANKSET:** FSA Gossamer Pro, BB30, 53/39 **COCKPIT:** Cannondale C3 base / FSA Tri Max Team
GROUP: Shimano 105 / MicroShift **COLOR:** Jet Black w/ White, Silver - Gloss

CYCLOCROSS

SUPERX

SUPER. CROSS. ANY QUESTIONS?

SUPERX HI-MOD DISC
BLACK INC.

FRAMESET: SuperX Disc, BallisTec Hi-MOD WHEELSET: Stan's Alpha 340, tubeless CRANKSET: HollowGram Si, 46/36 GROUP: SRAM RED 22
BRAKES: SRAM HRD Hydraulic Disc COLOR: Nearly Black w/ Green - Matte

With its BallisTec carbon construction and SAVE Stays, the SuperX is lighter than most road bikes, unmatched in stiffness-to-weight and smoother than a Belgian beer. Nothing will accelerate faster, corner harder or be easier to shoulder than the SuperX.

SUPERX DISC FORCE

FRAMESET: SuperX Disc, BallisTec Carbon **WHEELSET:** Vision Team 30 Disc **CRANKSET:** FSA Gossamer Pro Cross, BB30, 46/36 **GROUP:** SRAM Force 22
BRAKES: SRAM BB7 Black Ultimate **COLOR:** Carbon w/ Gray, Red - Gloss

MOUNTAIN
INTRO

MOUNTAIN

OVERMOUNTAIN

Boundary-breaking, dual-travel, dual-geometry, two-in-one superbikes that redefine the "all" in all-mountain riding.

CROSS-COUNTRY FULL SUSPENSION

Light, responsive, versatile mid-travel full suspension bikes designed for fast trail riding.

CROSS-COUNTRY HARDTAIL

Ultra-light, race-oriented hardtails for riders seeking the ultimate in efficiency and speed.

TRAIL HARDTAIL

Light, durable, high-performance mountain bikes for all-around trail riding.

LEFTY

LEFTY AND SUPERMAX

THE LIGHTER-STIFFER-STRONGER-SMOOTHER FRONT SUSPENSION SOLUTIONS.

LEFTY

Superior suspension performance through unconventional design.

XLR/PBR DAMPER OPTIONS

Available with either XLR remote lockout, or PBR push button lockout for out-of-the-saddle hammering.

CRAZY LIGHT

Almost a pound lighter than its competitors AND it's stiffer and smoother? Sounds crazy and, well, Lefty is a bit crazy.

SUPERMAX

Everything that makes Lefty great is what makes SuperMax great - now it's just bigger and badder.

MASSIVELY OVERSIZED

The SuperMax's lower leg is 36mm in diameter, while the upper leg measures a whopping 46mm for maximum stiffness and steering precision.

SHORT STEM COMPATIBLE

To accommodate trail riding set-ups, an offset axle allows the fork leg to sit further back, creating enough clearance to run stems as short as 50mm.

60MM AXLE OFFSET

SuperMax's 60mm offset achieves the holy grail of long travel 29ers - stable handling at speed and responsive steering when things get tight and technical.

LIGHTER

At 1332 grams and 1850 grams respectively, the Lefty Carbon XLR and SuperMax Carbon are over 300 grams lighter than their competitors.

STIFFER

Their unconventional design give them stiffness comparable to the burliest freeride forks, while weighing less than any competitor. Lightweight efficiency with heavyweight control.

STRONGER

Gram for gram, Lefty and SuperMax are the strongest forks in the world. Even our lightest forks go head to head in destructive testing with forks designed for much more abusive riding. Cross-Country weight meets All-Mountain tough.

SMOOTHER

The heart of the Lefty, Cannondale's patented hybrid needle-bearing technology keeps the suspension moving freely, regardless of load. Even

under the hardest braking, impact, and steering forces, the wheel is able to track the ground fluidly for maximum control.

LESS MAINTENANCE

Lefty and SuperMax require around half the regular maintenance of the competition. With its long service intervals and completely replaceable wear-parts, you'll spend less time and money servicing, and more time riding.

OVERMOUNTAIN

TRIGGER 29

TWO PERSONALITIES...AND THEY'RE BOTH BAD-ASS.

TRIGGER 29 CARBON 1

FRAME: Trigger 29, BallisTec Hi-MOD Carbon SUSPENSION R/F: Fox DYAD RT2 (130/80mm) / Lefty SuperMax Carbon PBR 130 29 (130mm)
RD/SHIFT: SRAM XX1/X01 WHEELSET: Mavic Crossmax ST 29 BRAKES: Magura MT6 SEATPOST: RockShox Reverb Stealth
COLOR: Jet Black w/ Gray, White, Green - Matte

With a flick of the switch, the Trigger 29 transforms from a 130mm-travel, pick-any-line, roll-over-anything trail eater, to an 80mm-travel climbing machine. Add in the switchback-slicing SuperMax with custom offset, and you get a bike so good, it's crazy...

BALLISTEC CARBON / SMARTFORMED ALLOY

Using fibers developed by the military for ballistic armoring, this high-strength carbon construction process yields a frame that's lighter than aluminum and pound-for-pound stronger than steel. The alloy versions use our ultra sophisticated SmartFormed aluminum construction for a frame that's strong yet light.

ECS-TC SYSTEM

Clamped 15mm thru-axles in the shock linkage and swingarm pivot, as well as double bearings at the rear dropouts eliminate flex for unmatched responsiveness and control.

DYAD RT2

The world's only true 2-in-one shock. DYAD's dual modes allow you to completely change travel, damping and geometry on the fly for the best possible performance across the widest spectrum of terrain.

TRAVEL

80mm to 130mm on-the-fly adjustable rear travel.

LEFTY SUPERMAX

With its off-the-charts torsional rigidity, the SuperMax brings unheard-of levels of steering precision to longer travel 29'ers. The unique 60mm offset improves both high speed stability and low speed agility - perfect for Trigger 29's full-throttle attitude.

TWO PERSONALITIES...AND THEY'RE BOTH BAD-ASS.

TRIGGER 29 CARBON 2

FRAME: Trigger 29, BallisTec Hi-MOD Carbon **SUSPENSION R/F:** Fox DYAD RT2 (130/80mm) / Lefty SuperMax PBR 130 29 (130mm) **RD/FD/SHIFT:** Shimano XT/SRAM X7/

XC FULL SUSPENSION

XC FULL SUSPENSION

SCALPEL 29

BE A TRAIL SURGEON.

SCALPEL 29 CARBON
BLACK INC.

FRAME: Scalpel 29, BallisTec Hi-MOD Carbon SUSPENSION R/F: Fox Float CTD Kashima (100mm) / Lefty Carbon XLR 100 29 (100mm) RD/FD/SHIFT: Shimano XTR/SRAM XO/Shimano XTR
WHEELSET: ENVE Carbon Twenty9 XC / Chris Kings BRAKES: Shimano XTR Race SEATPOST: RockShox Reverb Stealth COLOR: Nearly Black, w/ Black, Gray Accents - Matte

The Scalpel 29 is proof that a bike can be rock solid and feather-light at the same time. With its ultra stiff-and-smooth Lefty fork, BallisTec carbon construction and ECS-TC pivots, it's the most efficient pedalling and precise handling XC dualie weapon out there.

SUPERLIGHTWEIGHT DESIGN

Ultra light BallisTec Carbon or SmartFormed Alloy frames with the System Integration of the Lefty fork, OPI stem/steerer and Hollowgram SL cranks delivers complete bike weights our competitors can only dream of.

ECS-TC SYSTEM

A clamped, 15mm thru axle in the shock linkage eliminates flex and play, providing unmatched center-stiffness for optimum control and steering precision.

TRAVEL

100mm front and rear.

29'ER RACE GEOMETRY

The combination of a steeper-than-average head angle and super short chainstays gives the Scalpel 29'er a similar wheelbase and trail to our 26'er bikes for ultra sharp, responsive handling.

ZERO-PIVOT SEATSTAYS

The seatstays are designed to flex vertically while remaining extremely stiff laterally and torsionally. This enhances suspension performance without affecting power delivery.

BE A TRAIL SURGEON.

SCALPEL 29 CARBON TEAM

E-SERIES
INTRO

E-SERIES

"Pure Efficiency" is the heart of the Cannondale E-Series. Designed from the ground up, specifically for the performance-minded rider; a seamlessly integrated Bosch's instinctive drive system, sportive geometry, disc brakes and a headshok fork deliver a perfect riding experience. Intuitive, powerful and easy, the E-Series features best-in-class torque, ultra-smooth power delivery, and exceptionally low weight.

MAVARO HEADSHOK
