

WOMEN'S

Cannondale Women's is created for women, by women. We build our bikes for you, from the ground up. We ride with you; we listen to you; we are one of you. Whether you are racing the local crit or commuting around town, there is a Cannondale Women's bike for you.

At Cannondale Women's, we are driven by the philosophy that all of our bikes be designed to provide the best fit, ensure the best features and inspire with signature fashion.

Fit: Each bike, whether intended for an elite racer or the first-time rider, should be built with that particular woman in mind. From geometry to tube shaping, we are dedicated to providing the best possible sizing for women small to tall.

Features: From smaller handlebars to size-specific damping, we are committed to making these bikes rideable right out of the box. Less fiddling and part swapping means you're out and riding faster.

Fashion: Our women's design team looks at everything from trending colors to our very own athletes for inspiration. The result? Graphics that inspire you to explore life on two wheels.

SUPERSIX EVO WOMEN'S

THE MOST ADVANCED WOMEN'S ROAD RACE MACHINE EVER MADE.

The best bike in the world, re-engineered for women. With its women's specific geometry and sublime balance of feathery weight and unmatched stiffness, strength and comfort the SuperSix EVO Women's is ready for racers small to tall.

SUPERSIX EVO WOMEN'S IS:

- » Everything you ever dreamed a road bike could be...and more. Light, stiff, strong, smooth and built for you.
- » Ready for its close-up with subtle race-inspired graphics.
- » Built on our women's-specific elite geometry: Be aggressive.

RIDER PROFILE

The ultimate machine for elite women racers or those seeking to ride like one.

1 WOMEN'S SPECIFIC ELITE GEOMETRY:

Women's-specific geometry based on frontal stack height and reach for each of the 5 (48-56) sizes available, making size selection and fitting a cinch!

2 TWO BALLISTEC CARBON FRAME OPTIONS

2 - EVO Hi-Mod: The lightest women's race frame in existence. High modulus BallisTec construction delivers extreme light weight and stiffness.

3 - EVO Carbon: By using a higher percentage of intermediate-modulus fiber, we make EVO technology available to more women. Under 900 grams, it is still one of the lightest women's frames in the world.

3 SPEED SAVE MICRO-SUSPENSION REAR STAYS

Subtle flex zones built into the chainstays and seatstays allow the rear wheel to track the ground, improving speed, handling and comfort. Tuned to work with the SPEED SAVE Fork.

4 SPEED SAVE FORK

A directional BallisTec carbon layup and offset dropouts give the fork the ability to absorb shock. A 1-1/8" to 1-1/4" tapered steerer offers the best balance of weight and stiffness. Available in 2 rakes to eliminate toe overlap on small sizes.

5 DISTINCT ROUTING

Cable routing that changes according to the size of the frame provides the best possible braking and shifting performance.

6 WOMEN'S-SPECIFIC COMPONENTS

Narrower, ergonomic-shape handlebars, brakes positioned closer to the hands and women's saddles are just some of the details that make these bike such a joy to ride.

SIZES:

44, 48, 51, 54, 56cm

CAAD10 WOMEN'S

THE WORLD'S MOST ADVANCED ALUMINUM ROAD BIKE.

Forget about diamonds, CAAD10 is a woman's best friend. Weighing in at just 1020 grams for a 48cm frame, complete with hardware, and featuring our patented SPEED SAVE technologies, CAAD10 not only is the lightest aluminum road frame ever created, it's lighter than most of our competitors' elite carbon frames.

CAAD10 WOMEN'S IS:

- » Lighter, stiffer, and smoother riding than most elite carbon frames.
- » Purposefully re-engineered for women with a lighter tubeset and dialed with all-new women's race geometry
- » Incredible value at an unbeatable pricepoint.

RIDER PROFILE

High-performance oriented women seeking a racy, lively, sharp-handling alternative to carbon.

1 ALL-NEW WOMEN'S RACE GEOMETRY

The CAAD10 has the same stack/reach based geometry as the exceptional Women's EVO. With shorter top tubes, slightly taller headtubes, and fork rakes that minimize toe overlap, Women's Race Geometry delivers razor-sharp handling that fits.

2 SMARTFORMED 6069 ALLOY CONSTRUCTION

A complex mix of hydroforming, mechanical shaping, taper-butting, double-pass smooth welding and heat treating, SmartForming is the most advanced aluminum construction in the world, for lighter, stronger frames.

3 SPEED SAVE VIBRATION ELIMINATION SYSTEM

The fork and rear stays on the CAAD10 are designed to allow perfectly balanced vertical flex. This lets the wheels track over rough roads, improving comfort, handling and control.

4 FORM FOLLOWS FUNCTION

From the oversized tapered head tube, to the laterally ovalized seat tube, to a top tube that is oversized for stiffness, but narrows through the center for knee clearance, every inch of the CAAD10 is engineered to perform. Even the cable routing changes with sizes to ensure ideal function on all sizes.

5 WOMEN'S-SPECIFIC COMPONENTS

Narrower, ergonomic-shape handlebars, brakes positioned closer to the hands and women's saddles are just some of the details that make these bike such a joy to ride.

6 DI2 READY

All frames are Di2 ready and ship with all necessary wiring guides and cable covers.

WOMEN'S ENDURANCE ROAD

The entire Synapse line was designed and engineered with one purpose in mind: to create the perfect partner for all your epic rides. With its SAVE PLUS micro-suspension system, feathery light weight and a riding position that encourages longer days in the saddle, our Synapse road bikes will encourage you to ride further, faster and more than ever before.

SYNAPSE CARBON WOMEN'S

SILKY SMOOTH. DECEPTIVELY FAST.

The Synapse Carbon's potent blend of light weight speed and all-day comfort make it the perfect choice for a long century ride, a sprint triathlon and anything in between.

SYNAPSE CARBON WOMEN'S IS:

- » The perfect blend of high-performance and comfort technologies for a bike you will want to ride all day long.
- » Stable, confident and fast, thanks to Cannondale Women's S.E.R.G. geometry.
- » Silky smooth, thanks to the SAVE PLUS micro-suspension system which keeps you rolling in comfort when the road gets bumpy.

RIDER PROFILE

For the rider looking to test her limits...comfortably.

1 WOMEN'S S.E.R.G. GEOMETRY

Our Women's S.E.R.G. (Synapse Endurance Race Geometry) is based on an even spread of stack and reach, ensuring consistent jumps between sizes, and features a taller head tube, slightly relaxed head angle and a longer wheelbase for the perfect balance of racy agility and stable comfort.

2 SAVE PLUS MICRO-SUSPENSION (REAR TRIANGLE AND FORK)

The frame's carbon layup is designed to damp out road buzz, while the radical helixed shapes of the rear chain stays and seat stays work in conjunction with the sculpted front fork to absorb small and medium size bumps, allowing the wheels to track the road, keeping you comfortably in control.

3 SAVE PLUS MICRO-SUSPENSION (SEAT POST AND SEAT TUBE)

The seat post and seat tube work together to insulate the rider from bigger bumps when seated. The smaller 25.4mm diameter seatpost flexes more than larger diameter posts, aided by the internal wedge seatclamp design which allows more of the post to flex, and the seat tube is designed to bow under load as well, protecting the rider from impacts.

4 POWER PYRAMID SEAT TUBE / BB30A

The seat tube splits asymmetrically to meet a new wider 73mm BB30A bottom bracket, for maximum stiffness with minimal weight.

5 LARGER TIRES

The larger volume 700x25c tires found on all Women's Synapses provide more comfort and stability and are less likely to pinch flat. The frames can accept up to 28c tires.

6 TWO BALLISTEC CARBON OPTIONS

The carbon Synapses are available in two versions of our advanced BallisTec Carbon Construction. Synapse Hi-MOD: High modulus fibers are used to tune stiffness and ride feel for the best balance of rigidity to weight. Synapse Carbon: The same construction but using higher quantities of intermediate modulus fibers to tune stiffness.

SYNAPSE WOMEN'S

THE COMFORTABLE, LIGHT, "JUST RIGHT" ROAD BIKE.

From first road rides to all-day adventures to fender-equipped commutes, the alloy Women's Synapse will be your perfect partner.

SYNAPSE ALLOY WOMEN'S IS

- » A versatile and comfortable ride for the new roadie, the fitness rider or the speedy commuter.
- » Ultra lightweight and efficient thanks to Cannondale's advanced alloy construction techniques.
- » Supremely comfortable due to its upright position and SAVE technology.

RIDER PROFILE

For first-time road riders, outdoor fitness lovers or anyone who is looking for a great blend of comfort, speed and value.

1 WOMEN'S ENDURANCE GEOMETRY

With a longer wheelbase and room for fenders, the geometry is biased a bit more towards overall stability than the S.E.R.G. found on the carbon versions but, with a virtually identical rider position, the Synapse Alloy retains the responsive, crisp-handling you'd expect from a Cannondale.

2 SAVE PLUS COMFORT FEATURES

SAVE PLUS micro-suspension features in the carbon-bladed fork and rear triangle of the bike improve comfort and control.

3 25.4MM SEATPOST

The smaller 25.4mm diameter seatpost offers more flex, and thus more comfort, than bigger diameter seatposts.

4 CANNONDALE ALUMINUM CRAFTING

Cannondale's legendary double-pass smooth welds join optimally shaped 6061 alloy taper-butted tubes for a great combination of light weight, stiffness and durability. Internal routing keeps cables clean and looks great.

5 RACK/FENDER MOUNTS

Subtle, understated rack and fender mounts add great versatility.

TRAIL 7

TANGO SL 29

BIGGER WHEELS. SMALLER RIDERS. PERFECT MATCH.

With an ultra-low standover height and geometry designed for women, the Tango SL lets smaller riders experience the advantages of bigger wheels, without the compromises.

TANGO SL 29 IS:

- » Comfortable and confidence-inspiring thanks to great standover clearance and dialed geometry.
- » Incredibly stiff and strong, especially with the Delta V style front triangle.
- » The ladies' way to roll big. Tango's 29-inch wheels offer stable handling and a smooth ride.

RIDER PROFILE

For the female trail rider who wants the confidence and speed that comes from a 29'er that actually fits.

1 WOMEN'S 29 GEOMETRY

Women's specific 29 geometry eliminates the compromises associated with smaller riders and bigger wheels. The Tango SL utilizes the one-and-only Delta V design for the lowest standover in the industry.

2 SMOOTH WELDS

Trademark double-pass smooth welds showcase Cannondale's aluminum frame mastery. Since we don't patch fill with putty and paint, our process eliminates the stress-risers and weak points found on traditionally welded frames, enabling us to build lighter, stronger frames everywhere in the line.

3 SAVE MICRO-SUSPENSION

Optimized seat stay and chain stay shaping provides vertical compliance for a more comfortable ride with no loss in lateral rigidity.

4 1.5" HEAD TUBE

1.5" headtubes and forks provide a stiffer front end for better handling on gnarly trails.

TANGO

CANNONDALE HIGH-PERFORMANCE AT AN AFFORDABLE PRICE.

Their incredible performance and value make the light, smooth Tango bikes the perfect entry point into the world of mountain biking.

TANGO IS:

- » Light and strong thanks to Cannondale's advanced alloy construction.
- » A comfortable high-performance ride due to SAVE technologies and size-specific suspension.
- » 27.5" (650b) wheels for great fit and easy handling

RIDER PROFILE

For experienced riders looking for an affordable upgrade, or new riders looking for a performance head start.

1 WOMEN'S-SPECIFIC GEOMETRY

Designed for a women's proportions, the Tango comes in smaller sizes, with shorter top tubes and size specific headtube lengths.

2 SAVE MICRO-SUSPENSION STAYS

Optimized seat stay and chain stay shaping provides vertical compliance for a more comfortable ride with no loss in lateral rigidity.

3 27.5" (650B) WHEELS

27.5" wheels are a perfect choice for smaller riders. They bring some of the roll-over-anything capabilities and traction of 29" wheels, but reduce toe-overlap and fitting issues on smaller frames.

4 CUSTOM FORKS

Because ride feel and suspension are key to enjoyment, we've engineered size-specific springs so that the forks on each individual size are better suited to each rider and have a consistent response throughout the range.

5 SMOOTH WELDS

Trademark double-pass smooth welds showcase Cannondale's aluminum frame mastery. Since we don't patch fill with putty and paint, our process eliminates the stress-risers and weak points found on traditionally welded frames, enabling us to build lighter, stronger frames everywhere in the line.

FELICITY

FELICITY

QUICK SPEED AND QUICK

LIFE. STYLE.

Our experience with high-end road bikes has led us to take a performance-based approach to recreational cycling. With Quick Speed and Quick, we've blended light weight, smooth comfort, and a balanced riding position for a true Cannondale riding experience. On a Quick, you'll go a little faster, ride a little further, and push yourself a little harder than you ever thought possible.

QUICK IS:

- » Road bike speed mated to flat-bar comfort.
- » Light, spirited, fast and fun.
- » The perfect bike for fun outings with friends, charity rides or enjoying the scenery while getting fit.

RIDER PROFILE

For the fitness-oriented person who wants to get out of the gym and put in some miles...comfortably.

1 QUICK SPEED

For 2015, the Quick Speed replaces the former Quick SL. The all-new Quick Speed is lighter, has more pronounced SAVE features for comfort, and has a sleek, modern look.

2 CUSTOM FORKS

Each Quick is paired with a custom Cannondale fork designed specifically for the frame, for a seamless look, great handling and noticeable weight savings.

3 RIDER-TAILORED GEOMETRY

For Quicks, Rider Tailor Geometry fuses an efficient, sporty position with the confidence and comfort of heads-up riding.

4 SAVE ANTI-VIBRATION TECHNOLOGY

The rear triangle of the bike is engineered to absorb shock by allowing the frame to flex slightly, improving comfort and control.

5 COMMUTE-READY

All Quicks are rack and fender ready.

ALTHEA

SPORT. UTILITY.

With its low-standover, mountain-bike-inspired frame, its 700c knobby tires and 50mm suspension fork, the Althea can take you from pavement, to dirt, to gravel and back...with a smile on your face.

ALTHEA IS:

- » Like a sport-utility vehicle. Fast and comfy on the pavement and confidently capable off-road.
- » Ready for any adventure, from gravel paths to full loaded touring.
- » A great rough-road commuter. Cobbles and potholes don't faze Althea.

RIDER PROFILE

An adventurous bike for adventurous spirits. From rugged urban commuting to dirt-road exploration, Althea is the perfect mix of sport and utility.

1 MOUNTAIN-INSPIRED FRAME.

The women's frame design matches the ruggedness of a mountain bike with the speed of 700c wheels. Super low standover means easy mounting and dismounting.

2 RIDER-TAILORED GEOMETRY - ALTHEA

The women's specific geometry of the Althea delivers the speed and agility of a city bike, with the stability and heads-up comfort of a mountain bike.

3 BETTER SAVE FEATURES

Comfort gets a boost on the Althea with the SAVE micro-suspension rear triangle soaking up bumps and chatter better than ever.

4 CUSTOM FORKS

For comfort and control, the Altheas come with suspension forks that are custom tuned for lighter riders.

5 ADVENTURE READY

Full rack and fender mounts mean the Althea is up for any adventure you can think of.
